E-mail: ekim@cheetahstudios.com

ADDRESS

1225 East Sunset Drive • Suite 145-789 • Bellingham • WA 98226

PROFILE

Objective Seeking to continue to master and expand my talent in the field of digital multimedia designs such as: front end web design exclusivity, high end professional photography, broadcast level videography and editing, and digital artistry. To coincide with a company's vision and make a positive impact for the company's future goals and success. To join a digital multimedia production company, or even a company starting from the ground level looking for a digital multimedia specialist to assist them in high end project quality end results.

Overview I've created graphic design concepts using Adobe Family Software. I've done digital image manipulation, low and high level of animations using GIF images as well as FLASH animation. I was involved in project production with banner templates, exclusive web site interface development, hard coding HTML templates, videography, broadcast level quality video editing, video web optimization. I've worked with HTML and scripting them from scratch, debugged HTML files, and Q and A systems. I've redesigned many of the company's front end web sites and web template navigation systems in unique styles and concepts. I do produce results for web sites with the sense of look and feel that conveys high quality and trust.

Education Ohio State University US-OH-Columbus:Majoring Art:digital Graphic Option.
